EDUCATION

B.Tech in Computer Science and Engineering

RGUKT Nuzvid, Andhra Pradesh

2024 – Present

SKILLS

Programming: Python, C, Java

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Machine Learning: Regression, Classification, Model Evaluation, Feature Engineering

Deep Learning: Neural Networks, MNIST Classification

Tools: Git, GitHub, Jupyter Notebook

Deployment: Streamlit

PROJECTS

Nexus Guard Fraud Detection System

Built an end-to-end machine learning pipeline to detect fraudulent transactions. Performed data preprocessing, feature engineering, and trained multiple models including Logistic Regression, Random Forest, and Gradient Boosting. Evaluated performance using precision, recall, F1-score, and ROC-AUC.

Tech stack: Python, Pandas, Scikit-learn, Matplotlib, Seaborn

GitHub Repo

Diabetes Prediction (End-to-End ML Project)

Developed a complete ML workflow from raw medical data to a deployed web application. Conducted EDA, feature selection, and trained models such as Logistic Regression, Random Forest, and SVM. Deployed the final model using Streamlit for real-time predictions.

Tech stack: Python, Pandas, Scikit-learn, Streamlit

Live App

MNIST Digit Classifier (Deep Learning)

Implemented a neural network model to classify handwritten digits from the MNIST dataset. Designed and trained the model using deep learning techniques and evaluated accuracy on test data.

Tech stack: Python, TensorFlow/PyTorch, NumPy, Matplotlib

GitHub Repo

Car Price Prediction

Built a regression model to estimate car prices based on features such as year, fuel type, and kilometers driven. Performed data cleaning, feature engineering, and model evaluation.

Tech stack: Python, Pandas, Scikit-learn, Matplotlib

GitHub

CERTIFICATIONS

Python Object Oriented Programming (LinkedIn Learning)

Python Data Analysis (LinkedIn Learning)

LANGUAGES

English, Hindi, Telugu, Odia
